Reutech Mining signs OHMS as Sub Surface Profiler training partner

Reutech Mining recently entered into a partnership with Open House Management Solutions (OHMS) as the official training partner and data analysis experts on the Reutech Sub Surface Profiler (SSP).

The SSP is a ground penetrating radar that was designed and developed for the mining industry by Reutech Mining. The system penetrates rock up to 10 metres and allows users to capture, view and analyse data enabling them to make informed decisions underground.

Reutech Mining is a passionate company dedicated to developing, manufacturing and distributing innovative technologies for the management of safety within the mining industry. They have been at the forefront of technological innovation for mining safety for more than a decade.

Established in 2006, after being approached by industry leaders in the mining sector requesting advanced geotechnical monitoring solutions. Since then the company has focused on providing and improving real-time mine safety for surface- and underground applications, as well as, contributing towards notable increases in the production output of a large number of mines globally.

OHMS is an international technical services provider to the minerals industry. The company has been in operation since January 2000 and employs well trained and skilled, professional consultants with specialized experience in the field of geotechnical services. The services are focused on rock engineering, numerical modelling, seismology, geotechnical instrumentation and monitoring and training in the various aspects of mine technical services.

"OHMS is extremely excited to be part of this innovative product, and look forward to working with the industry and Reutech Mining to better understand the geotechnical challenges mining throws at us. We not only own an SSP ourselves, but work closely with Reutech Mining and spend countless days perfecting the process of scanning, interpreting and visualising the data provided to us by the SSP," said Quintin Grix, senior consulting geotechnical engineer & head of consulting at OHMS.

"With this partnership we want to provide clients with state-of-the-art technology that contributes towards the safety of mines by offering training from industry leading specialists. We aim at empowering clients to use our systems to its maximum capabilities," said Jan de Beer, executive manager of Reutech Mining.
